EHRL BALQUIN

Calgary, AB | 403-903-0115 | ehrlbalquin@gmail.com | LinkedIn | GitHub | Portfolio

SUMMARY

- Software Development Diploma (SAIT, GPA 3.8) with demonstrated experience across the full stack — web, mobile, APIs, and databases — using Java, Python, JavaScript, and TypeScript.
- Built and shipped production-quality applications end-to-end: from API design and database modelling to mobile UI, async state management, and deployment on cloud infrastructure.
- Comfortable across the development lifecycle — design, implementation, testing, debugging, and documentation — with a track record of applying systematic problem-solving under real operational constraints.

SKILLS

- **Languages:** Java, Python, JavaScript, TypeScript, C#, SQL, HTML/CSS
- **Frontend & Mobile:** React, React Native (Expo), component lifecycle, state management, React Navigation, Reanimated
- **Backend & APIs:** Node.js/Express, FastAPI, RESTful API design, JWT authentication, role-based access control
- **Databases:** MySQL, PostgreSQL, MongoDB, SQLite — schema design, querying, integrity, migrations
- **Testing & QA:** Jest, unit testing, regression checks, defect reproduction, Postman API testing, Selenium WebDriver
- **DevOps & Tools:** Git/GitHub, CI/CD, Jenkins, Docker, AWS, Firebase, Agile delivery
- **Security:** OWASP-oriented input validation, XSS prevention, JWT session management
- **Languages (spoken):** English, Tagalog

PROJECTS

Electric Vehicle Advisor Chatbot | Python, FastAPI, HuggingFace, SQLite

- Designed and built a RESTful API from scratch with 30+ decision flows, achieving <200ms average response time — handled routing, input validation, endpoint design, and NLP model integration end-to-end.
- Implemented /search, /save, and /browse endpoints with structured query logic and OWASP-oriented security practices throughout.

Secure Web Application | React, Node.js/Express, JWT, PostgreSQL

- Built a full-stack application with token-based authentication, role-based access control, and real-time input validation — covers the complete auth lifecycle from registration through session management.
- Applied XSS prevention and input sanitization across all user-facing entry points.

Parking Mobile Application | React Native, Expo, AWS

- End-to-end mobile app consuming City of Calgary open data via REST APIs with geolocation services, permissions handling, and device-native integration.
- Reduced average search time by 30% and data usage by 40% through targeted caching and API optimization across 1,000+ daily lookups.

StudyMate App | React Native, TypeScript, React Navigation, AsyncStorage

- Cross-platform task management app — 3,900+ lines across 35 files with full Android and iOS targets, shipped to SDK 23–34.
- Implemented full CRUD lifecycle with persistent local storage, animated UI, and structured state management across a multi-screen navigation system.

EXPERIENCE

Pharmacy Assistant | Loblaw Companies Ltd. | Calgary, AB | Feb 2022 – Present

- Reduced internal software issue resolution time by 20% through structured troubleshooting and precise problem documentation — applied the same debugging discipline used in software development to real operational systems.
- Process 100+ daily transactions and manage records for 200+ patients weekly in a regulated, accuracy-critical digital environment — zero tolerance for data errors.

Customer Service Associate | Loblaw Companies Ltd. | Calgary, AB | Jan 2016 – Dec 2021

- Participated in POS system rollout — supported UAT, identified friction points during adoption, and trained staff on new workflows.
- Handled 50+ daily customer interactions with a 95% satisfaction rate.

EDUCATION & CERTIFICATION

Southern Alberta Institute of Technology (SAIT) | Software Development Diploma | June 2025 | GPA 3.8

Relevant coursework: Data Structures, Web Development, Mobile Development (Android/Kotlin, React Native), Database Management, Software Engineering

IBM SkillsBuild | Web Development Fundamentals | Dec 2025
